2-motor desks

Home

Ergonomic

The "Home" is a height adjustable desk that can adapt to the preferred working height of the user, providing a comfortable ergonomic experience whether sitting or standing. The built-in height control allows for a change of height from 710 - 1190 mm, with the desk remaining stable at any chosen height.

Elegant

This desk is characterized by its unique glass table top and smooth edges, making it a perfect fit for a home office environment. Available in black and white, the built-in handset blends in with the desk, allowing it to be used as a regular piece of furniture as well.

Compact & Flexible

Thanks to the compact design of the desk, it is able to fit into small rooms whilst keeping enough space on the table top for work essentials. In addition, it is very easy to set-up as most of the desk is pre-assembled, requiring only the columns to be attached to the table top.
